

New order, 1250 kN Kaiser press line from AGAB!

AGAB will in the springtime deliver a complete 1250 kN Kaiser press line incl. coil line. The capacity is up to 300 stroke / min and the press has a unique press geometry for its size. Assembled with 4 tie rods and prestressed cast iron stand with roller-bearing crank and double connecting rods for the smallest possible tolerances and for the best stability that gives extra tool life. The press design also shortens maintenance of tools and improves the quality of the details. The entire line will be installed incl. all protection and the latest dynamic teach in system that controls the press and peripherals. In addition to all the necessary monitoring possibilities, the system also has compressive force and control on punch scrap that can accompany the punches. AGAB, which sells both new and used press lines, currently has presses with press ancillary equipment in stock up to 6500 kN.
